Renewable Energy Resources John Twidell, Tony Weir

Renewable Energy Resources is a numerate and quantitative text covering the full range of renewable energy technologies and their implementation worldwide. Energy supplies from renewables (such as from biofuels, solar heat, photovoltaics, wind, hydro, wave, tidal, geothermal, and ocean-thermal) are essential components of every nation's energy strategy, not least because of concerns for the local and global environment, for energy security and for sustainability. Thus in the years between the first and this third edition, most renewable energy technologies have grown from fledgling impact to significant importance because they make good sense, good policy and good business.

This Third Edition is extensively updated in light of these developments, while maintaining the book's emphasis on fundamentals, complemented by analysis of applications. Renewable energy helps secure national resources, mitigates pollution and climate change, and provides cost effective services. These benefits are analysed and illustrated with case studies and worked examples. The book recognises the importance of cost effectiveness and efficiency of end-use. Each chapter begins with fundamental scientific theory, and then considers applications, environmental impact and socio-economic aspects before concluding with Quick Questions for self-revision and Set Problems. The book includes Reviews of basic theory underlying renewable energy technologies, such as electrical power, fluid dynamics, heat transfer and solid-state physics. Common symbols and cross-referencing apply throughout; essential data are tabulated in appendices.

An associated eResource provides supplementary material on particular topics, plus a solutions guide to Set Problems.

Renewable Energy Resources supports multi-disciplinary master degrees in science and engineering, and specialist modules in first degrees. Practising scientists and engineers who have not had a comprehensive training in renewable energy will find it a useful introductory text and a reference book.

From reader reviews:

Travis Wysocki:

The book Renewable Energy Resources give you a sense of feeling enjoy for your spare time. You need to use to make your capable more increase. Book can being your best friend when you getting strain or having big problem along with your subject. If you can make examining a book Renewable Energy Resources for being your habit, you can get considerably more advantages, like add your capable, increase your knowledge about a few or all subjects. You could know everything if you like open and read a book Renewable Energy Resources. Kinds of book are several. It means that, science publication or encyclopedia or other individuals. So , how do you think about this publication?

Carmen Fields:

The book Renewable Energy Resources can give more knowledge and information about everything you want. Why must we leave a good thing like a book Renewable Energy Resources? Wide variety you have a different opinion about reserve. But one aim that book can give many information for us. It is absolutely right. Right now, try to closer with your book. Knowledge or details that you take for that, you could give for each other; you are able to share all of these. Book Renewable Energy Resources has simple shape but the truth is know: it has great and massive function for you. You can search the enormous world by start and read a publication. So it is very wonderful.

Megan Fairbanks:

Within this era which is the greater man or woman or who has ability to do something more are more treasured than other. Do you want to become considered one of it? It is just simple approach to have that. What you have to do is just spending your time almost no but quite enough to possess a look at some books. One of several books in the top collection in your reading list is usually Renewable Energy Resources. This book and that is qualified as The Hungry Slopes can get you closer in growing to be precious person. By looking up and review this e-book you can get many advantages.

Ira Atwood:

A lot of people said that they feel fed up when they reading a book. They are directly felt the idea when they get a half parts of the book. You can choose typically the book Renewable Energy Resources to make your personal reading is interesting. Your personal skill of reading talent is developing when you just like reading. Try to choose easy book to make you enjoy you just read it and mingle the impression about book and reading through especially. It is to be very first opinion for you to like to available a book and learn it. Beside that the guide Renewable Energy Resources can to be your friend when you're feel alone and confuse with the information must you're doing of this time.
