Placing Latin America: Contemporary Themes in Geography

This comprehensive study offers a thematic approach to Latin America, focusing on the dynamic connections between people, places, and environments rather than on pre-defined notions about the region. The book's well-rounded and accessible analysis includes discussions of borders and migration; transnationalism and globalization; urbanization and the material, environmental and social landscapes of cities; and the connections between economic development and political change. The authors also explore social and cultural themes such as the illegal drug trade, tourism, children, and cinema. Offering a nuanced and clear perspective, this book will be a valuable resource for all those interested in the politics, economy, and society of a rapidly globalizing continent.
