Computer Systems Daniel Taipala
This book has been developed as a companion text to the University of the People open course CS1104 Computer Systems. The computer systems course takes the student on a fascinating journey that begins by learning the properties of conductors and semiconductors, through an understanding of how these properties are used to create transistors as switches, continues with the concepts of logic gates which are assembled into circuits, and eventually ends with the student developing their own computer system and writing assembly language programs for the computer system they design.
