The Nature of War in the Information Age: Clausewitzian Future (Strategy and History)

David J. Lonsdale

The Nature of War in the Information Age: Clausewitzian Future (Strategy and History) David J. Lonsdale

There has been a great deal of speculation recently concerning the likely impact of the 'Information Age' on warfare. In this vein, much of the Revolution in Military Affairs (RMA) literature subscribes to the idea that the Information Age will witness a transformation in the very nature of war. In this book, David Lonsdale puts that notion to the test.

Using a range of contexts, the book sets out to look at whether the classical Clausewitzian theory of the nature of war will retain its validity in this new age. The analysis covers the character of the future battlespace, the function of command, and the much-hyped concept of Strategic Information Warfare. Finally, the book broadens its perspective to examine the nature of 'Information Power' and its implications for geopolitics. Through an assessment of both historical and contemporary case studies (including the events following September 11 and the recent war in Iraq), the author concludes that although the future will see many changes to the conduct of warfare, the nature of war, as given theoretical form by Clausewitz, will remain essentially unchanged.

Joshua Mendez:

Are you kind of busy person, only have 10 or maybe 15 minute in your morning to upgrading your mind expertise or thinking skill perhaps analytical thinking? Then you are receiving problem with the book as compared to can satisfy your limited time to read it because this all time you only find reserve that need more time to be learn. *The Nature of War in the Information Age: Clausewitzian Future (Strategy and History)* can be your answer since it can be read by anyone who have those short free time problems.

Nicholas Gober:

As a pupil exactly feel bored in order to reading. If their teacher asked them to go to the library or to make summary for some book, they are complained. Just minor students that has reading's internal or real their interest. They just do what the instructor want, like asked to go to the library. They go to generally there but nothing reading critically. Any students feel that examining is not important, boring along with can't see colorful pics on there. Yeah, it is to get complicated. Book is very important to suit your needs. As we know that on this time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. So , this *The Nature of War in the Information Age: Clausewitzian Future (Strategy and History)* can make you experience more interested to read.
