Patient-Based Approaches to Cognitive Neuroscience (Issues in Clinical and Cognitive Neuropsychology)

Patient-Based Approaches to Cognitive Neuroscience (Issues in Clinical and Cognitive Neuropsychology)

The cognitive disorders that follow brain damage are an important source of insights into the neural bases of human thought. This second edition of the widely acclaimed *Patient-Based Approaches to Cognitive Neuroscience* offers state-of-the-art reviews of the patient-based approach to central issues in cognitive neuroscience by leaders in the field.

The second edition has been thoroughly updated, with new coverage of methods from imaging to transcranial magnetic stimulation to genetics and topics from plasticity to executive function to mathematical thought. Part I, on the history and methods of cognitive neuroscience and behavioral neurology, includes two new chapters on imaging, one covering the basics of fMRI in normal humans and the other on the functional imaging of brain-damaged patients, as well as updated chapters on electrophysiological methods and computer modeling. Part II, on perception and attention, includes new chapters on visual perception and spatial cognition as well as attention, visual, tactile, and auditory recognition, music perception, body concept, and delusions. Part III, on language, covers many aspects of language processing in adults and children, including reading. Part IV discusses memory and prefrontal function, including semantic memory and executive functions. Part V covers dementias and developmental disorders, among them Alzheimer's and Parkinson's diseases, mental retardation, ADHD, and autism, and includes a chapter on the molecular genetics of cognitive disorders.

From reader reviews:

Jamie Arellano:

This book untitled Patient-Based Approaches to Cognitive Neuroscience (Issues in Clinical and Cognitive Neuropsychology) to be one of several books that will best seller in this year, here is because when you read this publication you can get a lot of benefit onto it. You will easily to buy this book in the book retail outlet or you can order it via online. The publisher in this book sells the e-book too. It makes you quicker to read this book, because you can read this book in your Mobile phone. So there is no reason for you to past this reserve from your list.

Ida Hamilton:

Reading a reserve can be one of a lot of task that everyone in the world likes. Do you like reading book and so. There are a lot of reasons why people enjoyed. First reading a book will give you a lot of new information. When you read a book you will get new information since book is one of various ways to share the information or maybe their idea. Second, examining a book will make you more imaginative. When you reading through a book especially fiction book the author will bring that you imagine the story how the characters do it anything. Third, it is possible to share your knowledge to others. When you read this Patient-Based Approaches to Cognitive Neuroscience (Issues in Clinical and Cognitive Neuropsychology), you can tells your family, friends and also soon about yours guide. Your knowledge can inspire the mediocre, make them reading a guide.

Verla Foster:

Precisely why? Because this Patient-Based Approaches to Cognitive Neuroscience (Issues in Clinical and Cognitive Neuropsychology) is an unordinary book that the inside of the guide waiting for you to snap the idea but latter it will shock you with the secret the item inside. Reading this book beside it was fantastic author who else write the book in such awesome way makes the content within easier to understand, entertaining means but still convey the meaning fully. So , it is good for you because of not hesitating having this anymore or you going to regret it. This book will give you a lot of rewards than the other book have got such as help improving your proficiency and your critical thinking method. So , still want to postpone having that book? If I have been you I will go to the reserve store hurriedly.

Gloria Lentz:

Many people spending their time by playing outside having friends, fun activity together with family or just watching TV all day long. You can have new activity to invest your whole day by reading through a book. Ugh, do you think reading a book really can hard because you have to use the book everywhere? It fine you can have the e-book, having everywhere you want in your Smart phone. Like Patient-Based Approaches to Cognitive Neuroscience (Issues in Clinical and Cognitive Neuropsychology) which is getting the e-book version. So , why not try out this book? Let's see.
