## **Thinking Through Systems Thinking** Ion Georgiou

Systemicity is receiving wider attention thanks to its evident paradox. On the one hand, it occurs as a problem with complex symptoms. On the other, it is sought after as an approach for dealing with the non-linear reality of the world. At once problem and prize, systemicity continues to confound. This book details the mechanics of this paradox as they arise from human epistemological engagement with the world.

Guided by an original analysis of the fundamental idea of emergent property, *Thinking Through Systems Thinking* uncovers the distinct significance, but also incompleteness, of the systems approach as a theory of human epistemological engagement. The incompleteness is treated through a non-eclectic interdisciplinary investigation which meets ten distinctly developed criteria required of any potential interdisciplinary partner to systems thinking. There results a theory of knowledge - an epistemology - which is systemic in both senses of the term: it belongs to the general systems movement, and it is systemically structured. The systems movement is thus offered a distinct epistemological voice which can compete on equal ground with other philosophical/epistemological positions. In true systemic fashion, this theory of knowledge also offers methodological, ethical, and existential implications.

The book provides:

- a complete systems science epistemology built upon the idea of emergent property;
- a developed system theoretical understanding of consciousness, hence contributing to studies of consciousness in general and, moreover, to the understanding of the manner in which human beings engage epistemologically with the world;
- a detailed analysis of the relationship between emergent properties and the wholes which exhibit them;
- an in-depth explication of the fundamental importance of the idea of emergent property to system science;
- epistemological insights into some of the core ideas of systems science such as emergent property and boundary critique - indeed, the book's treatment of the former idea is unique in the system science literature and provides an advanced epistemological understanding of this idea;
- a fresh, and distinctly epistemological, understanding of von Bertalanffy's pioneering general system theory - an understanding which has served to also demonstrate the continuing relevance of the original ideas behind the contemporary face of systems science, and the manner in which such ideas sit well with phenomenology;
- a systemic understanding of two cornerstones of Husserlian phenomenology: intentionality and intuition;
- an introduction, detailed treatment, and delimitation of the epistemological ideas of dogmatism and bounded rationality;
- an original, epistemologically-focused critique of the idea of boundary analysis/boundary judgements;
- an original, epistemological treatment of the idea of alienation, further demonstrated as permeating systems science and phenomenology; and,
- an application for the development of organizational learning and knowledge management.

### From reader reviews:

#### **Gary Ackley:**

Book is to be different for each grade. Book for children until finally adult are different content. As it is known to us that book is very important for us. The book Thinking Through Systems Thinking has been making you to know about other expertise and of course you can take more information. It is extremely advantages for you. The publication Thinking Through Systems Thinking is not only giving you a lot more new information but also for being your friend when you sense bored. You can spend your spend time to read your reserve. Try to make relationship together with the book Thinking Through Systems Thinking. You never experience lose out for everything in the event you read some books.

#### **Brenda Wright:**

This Thinking Through Systems Thinking usually are reliable for you who want to become a successful person, why. The main reason of this Thinking Through Systems Thinking can be one of the great books you must have is giving you more than just simple examining food but feed anyone with information that might be will shock your earlier knowledge. This book is definitely handy, you can bring it just about everywhere and whenever your conditions throughout the e-book and printed ones. Beside that this Thinking Through Systems Thinking giving you an enormous of experience for example rich vocabulary, giving you trial of critical thinking that we understand it useful in your day action. So , let's have it appreciate reading.

#### **Herman Jenkins:**

This Thinking Through Systems Thinking is new way for you who has interest to look for some information given it relief your hunger of information. Getting deeper you in it getting knowledge more you know or else you who still having small amount of digest in reading this Thinking Through Systems Thinking can be the light food for you because the information inside this specific book is easy to get by simply anyone. These books produce itself in the form which can be reachable by anyone, yes I mean in the e-book application form. People who think that in book form make them feel drowsy even dizzy this publication is the answer. So you cannot find any in reading a e-book especially this one. You can find what you are looking for. It should be here for you. So , don't miss it! Just read this e-book type for your better life and also knowledge.

#### **Amanda Young:**

As a pupil exactly feel bored to reading. If their teacher questioned them to go to the library or to make summary for some book, they are complained. Just little students that has reading's heart or real their leisure activity. They just do what the teacher want, like asked to the library. They go to at this time there but nothing reading really. Any students feel that looking at is not important, boring and also can't see colorful photos on there. Yeah, it is for being complicated. Book is very important to suit your needs. As we know that on this period, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore this Thinking Through Systems Thinking can make you sense more interested to read.
