Sherry Ginn, Michael G. Cornelius

The Sex Is Out of This World: Essays on the Carnal Side of Science Fiction (Critical Explorations in Science Fiction and Fantasy) Sherry Ginn, Michael G. Cornelius

"Science fiction" can be translated into "real unreality." More than a genre like fantasy, which creates entirely new realms of possibility, science fiction constructs its possibilities from what is real, from what is, indeed, possible, or conceivably so. This collection, then, looks to understand and explore the "unreal reality," to note ways in which our culture's continually changing and evolving mores of sex and sexuality are reflected in, dissected by, and deconstructed through the genre of science fiction. This book is a collection of new essays, with the general objective of filling a gap in the literature about sex and science fiction (although some work has gone before, none of it is recent). The essays herein explore the myriad ways in which authors--regardless of format (print, film, television, etc.)--envision very different beings expressing this most fundamental of human behaviors.
