Sufficiently Advanced Technology (Inverse Shadows Book 1) Christopher Nuttall

The Confederation, a multi-planetary post-singularity society, desperately wants to know how to achieve transcendence into an Elder Race. Their scouts encounter Darius, a lost colony world whose inhabitants have apparently discarded the technology that brought them to the planet, in order to adopt a virtually feudal culture.

But the scouts are shocked when they discover that the controlling elite, in each of the major centres of population, exhibit abilities that defy the accepted laws of physics. Although the population appear to believe their leaders to be capable of performing sorcery, the Confederation concludes they must in fact be using a technology sufficiently advanced to seem like magic. Is it a technology left behind by long-gone Elders, or an indication of an advanced race trying to control the colony – perhaps one of a number of such races who are intent on meddling in human affairs?

Either way, the need to understand and utilise such a technology leads the Confederation Security Council to launch an urgent mission to investigate Darius. Suitable specialists are swiftly enlisted to create a team, including both scientists and AIs, but all under military control. Protocol dictates that stealthy infiltration should precede initial contact, but the lack of sufficient prior observation and analysis will make it harder for the team to establish a credible cover story. Although their ship can remain in a hidden orbit, the research team will be on their own once they land, especially as Confederation technology seems to be unreliable or even inoperative on the planet's surface. But they will soon discover that the people on Darius are not all the simple folk that they seem.

This is the first book in the exciting new epic Inverse Shadows universe from best-selling science fiction author Christopher Nuttall.

It makes you more easily to read this book, since you can read this book in your Touch screen phone. So there is no reason to your account to past this guide from your list.

Samuel Brown:

As a student exactly feel bored in order to reading. If their teacher inquired them to go to the library or make summary for some publication, they are complained. Just very little students that has reading's heart or real their pastime. They just do what the educator want, like asked to go to the library. They go to right now there but nothing reading really. Any students feel that examining is not important, boring and can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this era, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this Sufficiently Advanced Technology (Inverse Shadows Book 1) can make you really feel more interested to read.
