William F. Gilreath, Phillip A. Laplante

Computer Architecture: A Minimalist Perspective (The Springer International Series in Engineering and Computer Science) William F. Gilreath, Phillip A. Laplante

This book examines computer architecture, computability theory, and the history of computers from the perspective of minimalist computing - a framework in which the instruction set consists of a single instruction. This approach is different than that taken in any other computer architecture text, and it is a bold step. The audience for this book is researchers, computer hardware engineers, software engineers, and systems engineers who are looking for a fresh, unique perspective on computer architecture. Upper division undergraduate students and early graduate students studying computer architecture, computer organization, or embedded systems will also find this book useful. A typical course title might be "Special Topics in Computer Architecture." The organization of the book is as follows. First, the reasons for studying such an "esoteric" subject are given. Then, the history and evolution of instruction sets is studied with an emphasis on how modern computing has features of one instruction computing. Also, previous computer systems are reviewed to show how their features relate to one instruction computers. Next, the primary forms of one instruction set computing are examined. The theories of computation and of Turing machines are also reviewed to examine the theoretical nature of one instruction computers. Other processor architectures and instruction sets are then mapped into single instructions to illustrate the features of both types of one instruction computers. In doing so, the features of the processor being mapped are highlighted.

From reader reviews:

Byron Sierra:

Why? Because this Computer Architecture: A Minimalist Perspective (The Springer International Series in Engineering and Computer Science) is an unordinary book that the inside of the reserve waiting for you to snap the item but latter it will shock you with the secret the idea inside. Reading this book beside it was fantastic author who also write the book in such wonderful way makes the content inside easier to understand, entertaining means but still convey the meaning totally. So , it is good for you because of not hesitating having this ever again or you going to regret it. This amazing book will give you a lot of gains than the other book possess such as help improving your talent and your critical thinking way. So , still want to delay having that book? If I ended up you I will go to the reserve store hurriedly.

Adrian Woodson:

This Computer Architecture: A Minimalist Perspective (The Springer International Series in Engineering and Computer Science) is great reserve for you because the content that is certainly full of information for you who have always deal with world and still have to make decision every minute. This kind of book reveal it facts accurately using great manage word or we can point out no rambling sentences within it. So if you are read this hurriedly you can have whole info in it. Doesn't mean it only will give you straight forward sentences but tricky core information with wonderful delivering sentences. Having Computer Architecture: A Minimalist Perspective (The Springer International Series in Engineering and Computer Science) in your hand like getting the world in your arm, information in it is not ridiculous one particular. We can say that no e-book that offer you world within ten or fifteen second right but this publication already do that. So , this can be good reading book. Hey Mr. and Mrs. occupied do you still doubt this?

Martina White:

Is it you actually who having spare time and then spend it whole day simply by watching television programs or just laying on the bed? Do you need something totally new? This Computer Architecture: A Minimalist Perspective (The Springer International Series in Engineering and Computer Science) can be the response, oh how comes? It's a book you know. You are therefore out of date, spending your spare time by reading in this brand-new era is common not a geek activity. So what these guides have than the others?

Thomas Hill:

You may get this Computer Architecture: A Minimalist Perspective (The Springer International Series in Engineering and Computer Science) by go to the bookstore or Mall. Merely viewing or reviewing it could possibly to be your solve problem if you get difficulties to your knowledge. Kinds of this guide are various. Not only by simply written or printed but also can you enjoy this book by simply e-book. In the modern era similar to now, you just looking by your mobile phone and searching what their problem. Right now, choose your ways to get more information about your publication. It is most important to arrange yourself to make

your knowledge are still up-date. Let's try to choose proper ways for you.
