Engineers Engaging Community: Water and Energy (Synthesis Lectures on Engineers, Technology, and Society) Carolyn Oldham, Gregory Crebbin, Stephen Dobbs, Andrea Gaynor

Water and energy are fundamental elements of community well-being and economic development, and a key focus of engineering efforts the world over. As such, they offer outstanding opportunities for the development of socially just engineering practices. This work examines the engineering of water and energy systems with a focus on issues of social justice and sustainability. A key theme running through the work is engaging community on water and energy engineering projects: How is this achieved in diverse contexts? And, what can we learn from past failures and successes in water and energy engineering? The book includes a detailed case study of issues involved in the provision of water and energy, among other needs, in a developing and newly independent nation, East Timor. Table of Contents: Introduction / Energy and Community / Water: Scarcity, Sustainability, and Social Justice / Integrated Water Management as a Peace Dividend: Communities, Social Justice, and Capacity Building in Timor-Leste / Integrated Resource Management as a Path to Social Justice / Bibliography

From reader reviews:

Mike Costello:

The book Engineers Engaging Community: Water and Energy (Synthesis Lectures on Engineers, Technology, and Society) can give more knowledge and information about everything you want. So why must we leave a very important thing like a book Engineers Engaging Community: Water and Energy (Synthesis Lectures on Engineers, Technology, and Society)? A number of you have a different opinion about publication. But one aim that book can give many data for us. It is absolutely suitable. Right now, try to closer along with your book. Knowledge or data that you take for that, it is possible to give for each other; you are able to share all of these. Book Engineers Engaging Community: Water and Energy (Synthesis Lectures on Engineers, Technology, and Society) has simple shape but the truth is know: it has great and massive function for you. You can look the enormous world by open and read a e-book. So it is very wonderful.

Kirk Banks:

Nowadays reading books be than want or need but also become a life style. This reading habit give you lot of advantages. Associate programs you got of course the knowledge your information inside the book which improve your knowledge and information. The data you get based on what kind of publication you read, if you want drive more knowledge just go with training books but if you want experience happy read one using theme for entertaining like comic or novel. Often the Engineers Engaging Community: Water and Energy (Synthesis Lectures on Engineers, Technology, and Society) is kind of publication which is giving the reader unforeseen experience.

Earnest Koontz:

Information is provisions for those to get better life, information nowadays can get by anyone in everywhere. The information can be a information or any news even a concern. What people must be consider when those information which is in the former life are difficult to be find than now could be taking seriously which one would work to believe or which one often the resource are convinced. If you obtain the unstable resource then you have it as your main information you will have huge disadvantage for you. All of those possibilities will not happen inside you if you take Engineers Engaging Community: Water and Energy (Synthesis Lectures on Engineers, Technology, and Society) as the daily resource information.

Rosemary Lilly:

People live in this new morning of lifestyle always attempt to and must have the extra time or they will get great deal of stress from both lifestyle and work. So , once we ask do people have time, we will say absolutely yes. People is human not just a robot. Then we ask again, what kind of activity do you possess when the spare time coming to you of course your answer will unlimited right. Then ever try this one,

reading textbooks. It can be your alternative inside spending your spare time, the book you have read will be Engineers Engaging Community: Water and Energy (Synthesis Lectures on Engineers, Technology, and Society).
