A Comparative Syntax of the Dialects of Southern Italy: A Minimalist Approach (Publications of the Philological Society) Adam Ledgeway

The book investigates the little studied syntax of the dialects of southern Italy. In addition to providing a descriptive account of a wide range of syntactic phenomena, the discussion shows how the model of language embodied in Chomsky's (1995) *Minimalist Program* can be profitably extended to the study of the syntax of southern Italian dialects, focusing on such topics as Case-marking and finite, infinitival and participial complementation.
