## **Change your future through the time openings** L and JP Garnier Malet

In 1966 Jean-Pierre Garnier Malet, a young student of physics, surprised the scientific community with the publication of an article for the Paris Academy of Sciences. He made an astonishing discovery related to the properties of time in 1988. His theory about the doubling of time, published between 1998 and 2006, has provided many scientific premises. This theory, also and more importantly, allows us to understand the mechanism of life, of our thoughts and to make the best possible use of our intuitions, instincts and foresight that this doubling makes available to us at each moment. Along with his wife, Lucile, Garnier Malet has found the best way to make use of this monumental energy which we are being offered during this end of doubling cycle, to obtain an ongoing balance within our daily lives. Through our lack of understanding, this end of time has put us in a tight spot. In addition to making some of us mistakenly consider this to be the end of the world, we have created, without being aware of it, all sorts of potentials for chaos. Reading this book, you will be able to understand how you can truly “change your future” and, most importantly, sooth our ailing planet.
