Discover how dinosaurs evolved, how they looked, where they lived, how they behaved, and why they died: the current state of knowledge about the Monsters of the Mesozoic, complete in one volume.

Acclaimed dinosaur paleontologist and paleo-artist Gregory S. Paul conducts this definitive tour through the 140-million-year existence of the most exotic and interesting group of animals ever to walk the earth, assisted by the world's leading dinosaur experts.

Here you'll find remarkable stories about the first discoveries of dinosaur fossils, the beginnings of dinosaur paleontology, how the field has changed with modern technology, the most sensational finds, and the latest theories. You'll also explore the answers to such questions as:

- Did dinosaurs have feathers?
- Did dinosaurs fly?
- Were the dinosaurs sluggish, cold-blooded reptilians, or something radically different?
- What are the different dinosaur families, how were they named, and how are they related?
- What was the dinosaurs' world like, and how did it change during their reign?
- Are the birds of today the living descendants of predatory dinosaurs?
- How and why did the major dinosaur families become extinct?

Filled with spectacular full-color illustrations of dinosaurs in action, plus black-and-white art and graphics. The Scientific American Book of Dinosaurs features the latest information from the field of dinosaur paleontology, presented in a fascinating and accessible format.

You'll never think about dinosaurs the same way again!
